TRAC is planning the maintenance on the pits, taxiway or runway or some combination. The options reflect the feedback we've receive from members who suggested what maintenance needs to be done. So the maintenance mirrors members preferences, it is important that we get your feedback. Please keep in mind that some of the items are not feasible at this time unless TRAC finds a rich uncle. Regardless, still rank them in the order you believe is most important to maintain a quality airfield. Please rank the items in the order you believe the maintenance should be completed. Rank each item with a 1 highest to 11 lowest priority. You can use each ranking just once. That is you can't have two items ranked as an 8.
